What to fix first

The 12 most serious of 22 open findings across this workspace, worst first. Hidden findings are excluded, as they are everywhere else. The rest are in each asset's own report.

CRITICAL

SQL Injection — Input is placed directly into a database query
harbourline.example · Web App Scan — Crawl & Attack · CWE-89

HIGH

Reflected XSS — Input is reflected with the characters needed to inject markup
harbourline.example · Web App Scan — Crawl & Attack · CWE-79

Directory Listing — Anyone can browse the files in one of your folders
harbourline.example · Web App Scan — Crawl & Attack · CWE-548

DMARC Policy Not Enforced — Impersonation is being watched, not blocked
harbourline.example · Email Security Check · CWE-290

MySQL / MariaDB database is reachable from the internet
203.0.113.40 · Port Scan · CWE-1327

A lookalike domain serves a site and can receive email: harbourline-gr0up.example
harbourline-group.example · Brand Impersonation Monitor · CWE-451

MEDIUM

Expiring Certificate — Your certificate expires in 16 days
harbourline.example · SSL/TLS Check · CWE-298

Content Security Policy Allows Inline Script — Your content rules allow scripts written directly into the page
harbourline.example · Web App Scan — Crawl & Attack · CWE-693

SPF Soft Fail — Your SPF record does not ask for impersonated mail to be refused
harbourline.example · Email Security Check · CWE-290

Missing MTA-STS — Mail to this domain can be delivered unencrypted
harbourline.example · Email Security Check · CWE-319

Windows Remote Desktop is reachable from the internet
203.0.113.40 · Port Scan · CWE-1327

LOW

Cookie Without HttpOnly Flag — The cookie PHPSESSID can be read by scripts in the page
harbourline.example · Web App Scan — Crawl & Attack · CWE-1004
